## SUMMARY

Adobe Commerce certified Magento and Laravel engineer with 3+ years of production commerce work. Joined TechSevin Solution LLP as a fresher in February 2022 and now lead BharatEmart, BharatEmart OMS, Alfa, and TennisHub — Magento modules, Laravel APIs, search, logistics, payments, and production debugging on Nginx, MySQL, and GraphQL.

## SKILLS

**Commerce:** Magento 2.4, Adobe Commerce EE/CE, GraphQL, custom modules, multi-store

**Data & search:** MySQL, PostgreSQL, MongoDB, Elasticsearch, Algolia, Redis, RabbitMQ

**Integrations:** Razorpay, ShipRocket, TalyPay BNPL, Twilio, OMS APIs

**AI tools:** Cursor, Claude, Gemini, GitHub Copilot, Codex, ChatGPT

**Backend:** PHP 8.2, Laravel 12 / 10, REST / SOAP, JWT, queues / SQS, Node.js

**Ops:** Docker, Linux (Ubuntu), Nginx, AWS S3 / SQS, Git, Composer

**Frontend & mobile:** React 19, Vite, Redux, Kotlin / Android, Socket.IO

**Practices:** Production debugging, GraphQL caching, module reviews, staging sign-off

## SELECTED WORK

### BharatEmart — Magento 2.4 marketplace

GraphQL for catalog, checkout, vendors, RFQ, and returns. Custom modules for OMS API, ShipRocket, split orders, OTP login, Razorpay refunds, buyer clusters, and homepage / GraphQL performance.  
Magento 2.4 · GraphQL · ShipRocket · Razorpay · Custom modules

### BharatEmart OMS — Laravel 10 order management

Dedicated order service with SQS FIFO queues, PDF invoices, barcodes, and payment verification — order lifecycle outside Magento admin.  
Laravel 10 · SQS · PDF · Barcode · MySQL

### Alfa — Magento 2 store

Docker Compose with SSL, Elasticsearch, Redis, and Nginx, plus deploy scripts so Magento bring-up is repeatable for the team.  
Magento 2 · Docker · Nginx · Redis · Elasticsearch

### TennisHub — Magento 2 specialty retail

Magento 2 upgrade and catalog, checkout, and payments work for a tennis retail catalog — platform work, not a theme swap.  
Magento 2 · PHP · MySQL

### SwasthaOne — Laravel 12 healthcare platform

Appointments, provider / facility onboarding, JWT APIs, split PostgreSQL, Elasticsearch and Redis search, Razorpay, Twilio, and AWS S3.  
Laravel 12 · React 19 · PostgreSQL · Elasticsearch · Redis · Razorpay

## Also shipped

TalyPay BNPL Magento payment module (checkout, observers, webhooks); Alessa Kuwait on Adobe Commerce EE; Khiara Magento CE multi-store; TravelSync Android + Node.js realtime group travel stack.

## EDUCATION & CERTIFICATION

**B.Sc. Information Technology** · Mumbai University · 2021

**Adobe Commerce Developer** · Adobe · 2023

TECHSEVIN SOLUTION LLP · MUMBAI

# Roles

One company. Three roles. Production catalogs.

Feb 2022 – Present

CURRENT

## Team Lead

- Lead BharatEmart, OMS, Alfa, and TennisHub from architecture through production — Magento 2.4, Laravel, search, logistics, and payments.
- Review Magento and Laravel delivery, set technical direction, and debug production issues on Nginx, MySQL, and GraphQL paths.
- Own module design, staging sign-off, and catalog integrations: ShipRocket, Razorpay, OMS APIs.

GREW INTO THE ROLE

## Magento Developer / Senior Backend Engineer

- Built and maintained Magento 2.4 and Laravel commerce systems for production catalogs and order flow.
- Took ownership of custom modules, GraphQL, ShipRocket, Razorpay, split orders, OTP login, and OMS APIs.
- Debugged homepage cache, GraphQL timing, and catalog queries before moving into Team Lead.

STARTED AS A FRESHER

## Junior Magento Developer

- Joined TechSevin in February 2022 and learned Magento 2, PHP, MySQL, and how production commerce actually ships.
- Supported catalog, checkout, and backend tickets that became the foundation for leading store and OMS work.

MORE PROJECTS

### TalyPay — Magento BNPL

Custom Magento 2 payment method: checkout, observers, Web API, and webhooks so Magento order state stays in line with TalyPay.

### Khiara — Magento multi-store

Community Edition multi-store with local deploy tooling, shared MySQL, and Nginx so stores can be reproduced locally.

### Alessa Kuwait — Adobe Commerce EE

Enterprise Magento for a GCC retail catalog — attributes, checkout, and operational customizations on EE rather than CE.

### TravelSync — realtime mobile

Kotlin Android app plus Node.js, Socket.IO, PostgreSQL, MongoDB, Redis, and RabbitMQ for live group travel coordination.

HOW I WORK WITH AI

### Cursor

Day-to-day Magento 2, Laravel 12, and React. Agents for multi-file refactors, migrations, and reviewing diffs before staging.

### ChatGPT / Gemini

Architecture sketches, GraphQL edge cases, Magento internals, and turning production symptoms into a short checklist.

### Claude

Long Magento and Laravel refactors, module design, and reading a large diff with the production constraint still in mind.

### Copilot / Codex

Inline PHP and GraphQL completions, first-pass CLI work, then review against modules, queues, and real logs.

STRENGTHS

- Magento 2.4 marketplace work that stays in modules — GraphQL, split orders, OTP login, refunds — instead of core hacks.
- OMS as a dedicated Laravel service (queues, invoices, verification) rather than bloating Magento admin.
- Search, payments, and logistics under load: Elasticsearch, Algolia, Redis, Razorpay, TalyPay, and ShipRocket.
